# 1.0 EXECUTIVE SUMMARY

Thomas & Hutton was retained by the Laurens County Development Corporation to conduct a Phase I Environmental Site Assessment (ESA) on an approximately 122.24-acre parcel of property located on S Frontage Road, Gray Court, South Carolina in Laurens County (subject property). The Phase I ESA was completed in accordance with the guidelines set forth by the American Society for Testing and Materials (ASTM) Standard of Practice for Environmental Site Assessment: Phase I Environmental Site Assessment Process (Designation EI527-13).

Section 3.0 - Site Description, Section 4.0 - User Provided Information, Section 5.0 - Record Review, Section 6.0 - Site Reconnaissance, and Section 7.0 - Interviews provided the basis for the findings (Section 8.0), and conclusions (Section 10.0), of this Phase I ESA. Using the practically reviewable reasonably ascertainable information along with visual observations, the findings with respect to recognized environmental conditions are as follows.

On-site concerns and recognized environmental conditions:

- There are some areas of minimal miscellaneous dumping, which will need to be removed and disposed of properly, but is not considered a recognized environmental concern based on the visual inspection of the material present.
- Based on available information, Thomas & Hutton did not identify the likely presence of an on-site recognized environmental condition for the subject property.

Off-site concerns and recognized environmental conditions:

• Based on available information, Thomas & Hutton did not identify the likely presence of an off-site recognized environmental condition for the subject property.

# 2.0 INTRODUCTION

# 2.1 Purpose

The Phase I ESA was conducted to identify, to the extent feasible, recognized environmental conditions associated with the parcel of property located on S Frontage Road, Gray Court, South Carolina. The property is comprised of an approximate 122.24-acre parcel of property defined as TMS 157-00-00-002 in Laurens County, South Carolina. For the purpose of this ESA recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products on the property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property, or onto the ground, into the ground water or surface water of the subject property. A historical recognized environmental condition is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

# 2.2 Scope of Services

The scope of services for the ESA included the following tasks:

- 1. Review the reasonably ascertainable regulatory agency environmental database reports and confirm the location and distance of problem sites to the property during the walking inspection of the property;
- 2. Review of selected, available standard historical sources such as topographic maps, available aerial photographs, environmental reports, etc.;
- 3. Perform a visual reconnaissance of the property and surrounding properties to search for evidence of prior or ongoing sources of contamination;
- 4. Interview available individuals familiar with past and present property uses activities, and operations; and
- 5. Preparation of the Phase I ESA report in ASTM E1527-13 format summarizing the assessment observations and findings.

# 2.3 Significant Assumptions

The opinions included herein are based on practical review of reasonable and ascertainable information obtained during the investigation and our experience on similar projects. If additional information becomes available, we request the opportunity to review the information, reassess the potential concerns, and modify our opinions and conclusions.

Significant assumptions refer to assumptions that can have an impact on conclusions drawn by an environmental professional. The significant assumptions made in conducting this Phase I ESA are as follows:

• Thomas & Hutton performed a walk-through of the open spaces present at the Site for reconnaissance. Based on these methods, Thomas &

Hutton did not encounter any conditions to suggest that the unobserved portions of the subject property were significantly different from observed portions of the subject property. Therefore, we assume the parts not inspected by Thomas & Hutton are similar in all aspects to those parts of the subject property that were inspected during the site visit.

• The slope of the groundwater table, without interference from pumping or injections, often approximates land surface topography in the area where the subject property is located. Therefore, groundwater movement is assumed to be in approximately the same direction as the topographic slope.

# 2.4 Limitations and Exceptions

# 2.4.1 Limitations

In connection with the tasks performed during this assessment, Thomas & Hutton has exercised reasonable efforts to employ the highest professional standards applicable in the industry today. The findings and conclusions provided in this Phase I ESA Report are based on the results of the site reconnaissance, review of regulatory and historical records, and interviews with persons knowledgeable of the subject property and properties in the surrounding area. Thomas & Hutton cannot guarantee however, that the review of land histories has necessarily yielded complete or usable information, or that our preliminary evaluation of the site conditions revealed all possible sources of contamination. Because of these and other limitations, this study has included the application of judgment to scientific principles. To that extent certain results of this work may be based on subjective interpretations. There can be no assurance that definitive or desired results have been obtained, or that they are supportive of any given course of action. The information provided under this assessment is not to be construed as legal advice.

ASTM E1527-13 defines a "recognized environmental condition (REC)" as "the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: 1) due to release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment."

A "de minimis condition" is a condition that generally does not represent a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. De minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

ASTM E1527-13 defines a "controlled recognized environmental condition (CREC)" as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place

subject to the implementation of required controls (for example property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition identified as a controlled recognized environmental condition does not imply that the Environmental Professional has evaluated or confirmed the adequacy, implementation or continued effectiveness of the required control that has been, or is intended to be, implemented.

ASTM E1527-13 defines a "historic recognized environmental condition (HREC)" as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the Environmental Professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria).

ASTM E1527-13 defines a "business environmental risk" as "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice".

# 2.4.2 Exceptions

Exceptions to this Phase I ESA include non-scope items, such as but not totally inclusive of:

- No testing of soil, groundwater, surface water, air, debris, asbestos containing material, lead-based paint, radon, solid waste, hazardous waste, raw material, or product has been performed specifically for the investigation.
- A chain of title search for the property was not conducted as part of this assessment and is considered the responsibility of the user.
- Wetland delineation was not conducted or evaluated as part of this assessment.
- Endangered species survey was not conducted as part of this assessment. Cultural and historic resource studies were not performed as part of this assessment.

# 2.5 Special Terms and Conditions

No attempts have been made to independently verify information obtained during the investigation. There were no special terms or conditions applied to this Phase I ESA.

# 2.6 User Reliance

The Phase I ESA is a preliminary assessment that attempts to document the presence of any potential or actual threats to the environment (recognized

environmental conditions) and is not a complete characterization of the property's environmental situation. The Phase I ESA should not be relied upon to completely characterize the property's total environmental situation. The Phase I ESA cannot entirely eliminate all uncertainties regarding the potential for contamination of the soil, groundwater, or surface water. The Phase I ESA is performed to reduce the level of uncertainty and recognizes reasonable limits of time and cost. The findings provided in this Phase I ESA Report will assist the user and user's legal counsel in evaluating potential environmental risks that are associated with property transactions.

This report is provided for the exclusive use of the Laurens County Development Corporation and their subsidiaries and/or affiliates. This report is not intended to be used or relied upon in connection with other projects or by other unidentified third parties. The use of this report by any undesignated third party or parties will be at such party's sole risk and Thomas & Hutton disclaims liability for any such third-party use or reliance.

According to ASTM E1527-13, certain components of the Phase I ESA will expire 180 days from the date of that component and will require updating if the date of property acquisition exceeds this time period. The entire report will expire in one year. The following table lists the dates for pertinent components.

Component	Date of Initiation	Shelf Life
Environmental Database Search	October 24, 2017	180 days
Site Reconnaissance	October 26, 2017	180 days
Interviews	October 27, 2017	180 days
Environmental Lien Search	Not performed as a part of this Phase I Assessment	180 days
Declaration by Environmental Professional	November 2, 2017	365 days

# 3.0 SITE DESCRIPTIONS

# 3.1 Location and Legal Description

This property is comprised of an approximate 122.24-acre parcel, TMS 157-00-00-002 located on S Frontage Road, Gray Court, South Carolina in Laurens County. The subject property has a southern frontage on S Frontage Road and is bounded on all remaining sides by adjacent properties. The subject property location is shown on Exhibit A in Appendix A. An aerial of the subject property location is shown on Exhibit B in Appendix A.

# 3.2 Site and Vicinity General Characteristics

# 3.2.1 Topography

The subject property is located at an elevation ranging from 724 feet at the northwestern corner of the property to 810 feet above mean sea level (msl) towards the southeastern portion of the subject property. The subject property's general topographic gradient is west northwest. The general topographic setting of the subject property is illustrated on the USGS 7.5 minute series topographic quadrangle map for the 2014 Fountain Inn, Woodruff, Laurens North and Hickory Tavern Quadrangles.

# 3.2.2 Soils

The U.S. Department of Agriculture Soil Conservation Service (SCS) classification indicates the soil types at the subject property are primarily Hiwassee, Pacolet, and Cecil (Exhibit D in Appendix A). These soil types are generally well drained, and are classified as Hydrological Group Class B and B/D. Hydrologic group Class B - moderate infiltration, deep and moderately deep, moderately well and well drained soils with moderately coarse textures. Class B/D – Drained soils have moderate infiltration; undrained soils have poor infiltration.

# 3.2.3 Geology

The subject property is geologically located in the Piedmont Physiographic Region of South Carolina. The region is comprised of plateaus, relatively flat, raised areas of land. They are usually horizontal rises of rock, which were raised by forces of Earth. In South Carolina, the Piedmont region comprises one third of the area of SC and is typically hilly country containing many monadnocks. A monadnock is an isolated hill of bedrock rising conspicuously above the general level of the surrounding area. The Piedmont is underlain by metamorphic rocks of various origins that were folded during the Paleozoic as the North American and African plates converged.

# 3.2.4 Hydrology

The property is generally well drained. Storm water runoff from the subject property travels as sheet flow towards the low-lying areas on the northwestern side of the subject property. No storm water infrastructure is present at the site.

# 3.2.5 Hydrogeology

Typically, groundwater flow in the surficial aquifer beneath a site will follow a subdued replica of the surface topography, thus suggesting a probable flow towards the northwest (Exhibit C in Appendix A).

# 3.2.6 Floodplain

The subject property is located on Panels 45059C0075C and 45059C0100C of the Flood Insurance Rate Map for Laurens County, South Carolina. The map was prepared by the Federal Emergency Management Agency (FEMA). The map indicates that the subject property is located in Flood Zone X. Flood Zone X indicates that the area has minimal flood hazard and is outside the Special Flood Hazard Area (SFHA) and at a higher elevation than that of the 0.2-percent-annual-chance-flood.

# 3.3 Current Use of the Property

The subject property is currently used for silvicultural purposes. The subject property is mostly wooded with some cleared areas and evidence of clearing activities onsite. Refer to Section 6 - Site Reconnaissance and Section 7 - Interviews for additional detail concerning property uses and operations.

# 3.4 Description of Structures, Roads, and Other Improvements

The subject property is secured with one (1) gated entrance off S Frontage Road. There are no structures present onsite. Currently, timbering activities are taking place on the subject property and timbering equipment, including tractors and trucks, is present onsite.

Utilities available at the subject property include water, sewer, electricity, and natural gas. Water and sewer is provided by Laurens County Water & Sewer Commission. Electricity is provided by the Laurens Electric Co-Op and natural gas is provided by Clinton-Newberry Natural Gas and the Laurens Commission of Public Works. Refer to Exhibits B in Appendix A for a site aerial, Section 6 - Site Reconnaissance, and Section 7 - Interviews for additional detail concerning the subject property.

# 3.5 Current Uses of Adjoining Properties

The subject property is situated in a mixed-use area including agricultural, silvicultural, and industrial properties. Adjacent to the east is an industrial facility. Adjacent property to the north is agricultural, while adjacent property to the west is silvicultural or undeveloped. Adjacent property to the south consists of Interstate 385. Area property to the south is commercial and residential. Area property to the north, east, and west is agricultural and silvicultural.

# 4.0 USER PROVIDED INFORMATION

The purpose of this section is to report the tasks performed by the user Mr. Jonathan Coleman (Laurens County Development Corporation) and communicated to the environmental professional, which includes review of titles and judicial records, specialized knowledge or experience by the user, actual knowledge of the user, reason for a significantly lower purchase/lease price, and commonly known and reasonable obtainable information. Mr. Jonathan Coleman, Laurens County Development Corporation, responded to the requirements of this section. Refer to Section 7 - Interviews for additional details concerning Mr. Jonathan Coleman's interview.

# 4.1 Review of Titles and Judicial Records

Recorded land title records for recording or filing environmental liens or activity and use limitations have been reviewed by the user to identify the existence of such environmental liens or activity and use limitations and have found no environmental liens or activity use limitations that are material to recognized environmental conditions in connection with the property.

#### 4.2 Specialized Knowledge or Experience by the User

The user has communicated all specialized knowledge or experience that is material to recognized environmental conditions in connection with the property to the environmental professional. Mr. Jonathan Coleman was not aware of any recognized environmental conditions in connection with the property.

#### 4.3 Actual Knowledge of the User

The user has no actual knowledge of any environmental liens or activity use limitations (AULs) encumbering the property or in connection with the property.

#### 4.4 Reason for a Significantly Lower Purchase/Lease Price

The user has compared the purchase/lease price of the subject property to the fair market value of the property and believes that the purchase/lease price has not been influenced by any contamination by hazardous substances or petroleum products.

# 4.5 Commonly Known and Reasonable Obtainable Information

The user has communicated commonly known or reasonably obtainable information within the local community about the property that is material to recognized environmental conditions in connection with the property to the environmental professional.

# 4.6 Historical Documents

No historical documents were provided by the user.

# 5.0 RECORDS REVIEW

A search was performed on federal and state files for environmental problem sites within ASTM standard E 1527-13 search radius. For this search records were obtained from Environmental Data Resources, Inc. The complete Environmental Data Resources, Inc. reports are provided in Appendix B. The database search resulted in no Federal listings and one (1) State listing at the subject property or within the designated search radius of the subject property.

Four (4) orphan sites were returned with the database search. Three of these sites (Woodside Mills Furman Plant, Dowd Construction Company, Inc., and the Houston Property Site) were located and determined to be outside the respective search radii. The third orphan site (Vissage Auto Parts Co.) could not be located but upon examination of the site's history it was determined that it would not be a REC for the site. This site is discussed below.

# 5.1 Federal Files

The federal environmental data is a compilation of data that identifies environmental problem sites and activities from the records of the United States Environmental Protection Agency (USEPA). The data contained here is the result of a search of an Environmental Data System including but not limited to the following USEPA records:

- 1. The National Priorities (Superfund) List (NPL) is USEPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. To be included on the NPL, a site must either meet or surpass a predetermined hazard ranking score, be chosen as a state's top-priority site, or meet all three of the following criteria: (1) US Department of Health and Human Services issues a health advisory recommending that people be removed from the site to avoid exposure; (2) USEPA determines that the site represents a significant threat; and (3) USEPA determines that remedial action is more cost effective than removal action.
- 2. The Comprehensive Environmental Response, Compensation and Liability Index System (CERCLIS) is the EPA's compilation of the sites for which USEPA has or is investigating a release of hazardous substances. These sites may be subject to review in accordance with the terms and conditions of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund Act).
- 3. The Resource Conservation and Recovery Information System (RCRIS) contains information regarding: (1) Large Quantity Generators (LQG); (2) Treatment, Storage, and Disposal (TSD) facilities; and, (3) Small Quantity Generators (SQG), and Transporters, which are required to register their hazardous waste activity under the Resource Conservation and Recovery Act (RCRA). The RCRA Program identifies and tracks hazardous waste from the point of generation to the point of disposal.
- 4. The Emergency Response Notification System (ERNS) is a national computer database system that is used to store information on the release of hazardous substances into the environment. The ERNS reporting system contains preliminary information on specific releases, including the spill location, the substance released, and the responsible party.

5. No Further Remedial Action Planned Report (NFRAP) contains information pertaining to Sites that have been removed from the EPA's CERCLIS Database.

A search of the federal databases indicated that no Federal sites were located within the search radius. No NPL, RCRIS-LQG, RCRIS-TSD, RCRA CORRACTS, NFRAP, or ERNS sites exist within the search radius. The respective search radii were as follows: NPL - 1.0 mile; RCRIS-SG - 0.25 mile; RCRIS-TSD - 0.5 mile; RCRIS-LG - 0.25 mile; CERCLIS - 0.5 mile; NFRAP - 0.5 mile; RCRA-CORRACTS - 1 mile; SEMS - 1 mile; and ERNS - property only.

# 5.2 State and Other Files

The state environmental data is a compilation of data that identifies environmental problem sites and activities from the records of the South Carolina Department of Health and Environmental Control (SCDHEC). The data contained here is the result of a search of SCDHEC records, including but not limited to:

- 1. The Underground Storage Tank (UST) list is a comprehensive listing of all registered underground storage tanks located in the state of South Carolina.
- 2. The Leaking Underground Storage Tank (LUST) list is a comprehensive listing if all reported leaking underground storage tanks located in the state of South Carolina.
- 3. The Hazardous Waste Sites (HWS) list is a summary listing pertaining to those facilities located in the state of South Carolina that have been deemed hazardous to the public health and welfare by SCDHEC.
- 4. The South Carolina Permitted Landfills (SWF) list is a summary of information pertaining to all active and inactive licensed solid waste facilities within the state of South Carolina.
- 5. The South Carolina Environmental Facility Information System (SCEFIS) integrates information on environmental facilities, permitting, violations, enforcement actions, and compliance activities to support regulatory requirements, and target environmental quality improvements for the water, air, solid waste, and house waste program areas.
- 6. The Brownfields Public Record (BROWNFIELDS) lists properties where response actions under the South Carolina Hazardous Site Reuse and Redevelopment Act and planned, ongoing or completed.
- 7. The South Carolina Groundwater Contamination Inventory (SCGWCI) is any site that has groundwater contamination over a federal MCL.
- 8. The South Carolina Drycleaning Facility Restoration Trust Fund is used to access, prioritize and cleanup contaminated registered drycleaning sites.
- 9. The SCDHEC Bureau of Land and Waste Management established the RCR registry to help monitor and maintain sites that have conditional remedies. A Conditional Remedy is an environmental remedy that includes certain qualifications. These qualifications are divided into two major categories: Remedies requiring Land Use Controls and Conditional No Further Actions.
- 10. The VCP lists sites from SCDHEC that are Voluntary Cleanup Sites.

One (1) property was identified within the specified radii in in EDR's search of the UST, LUST, HWS, SCGWCI, INDIAN LUST, INDIAN UST, FEMA UST, INDIAN VCP, US

BRONWFIELDS, DEBRIS REGION 9, ODI, INDIAN ODI, US CDL, SC CDL, US HIST CDL, LIENS 2, HMIRS, SC SPILLS, SC SPILLS 80, SC SPILLS 90, DOT OPS, DOD, AND CONSENT.

Sites identified in EDR's review of other databases are summarized below.

Database	Radius Search	Sites Found
Leaking Underground Storage Tanks (LUST) The LUST database is an inventory of reported leaking underground storage tank incidents. This information comes from SC DHEC.	0.5 mile	2
Groundwater Contamination Inventory Cases (GWCI) The GWCI is an inventory of sites that have groundwater contamination over a federal MCL. This information is compiled by EDR.	0.5 mile	1

The listed LUST and GWCI site that was identified within the designated search radius (0.5 mile) is:

• Bragg Convenience Store, 10184 Highway 14, is located 0.482 miles to the south southeast of the subject property. This site was the location of one tank that has since been abandoned. The tank was a steel 550-gallon gasoline tank that was removed from the site in 1993. One release was reported for the site on May 8, 1993. Abatement was met on May 11, 1993 when the tank was removed from the site. Cleanup was initiated on June 9, 1993. Since the tank has been removed, this site is not considered to be a REC for the subject property.

The listed LUST site that was identified but could not be located is:

• Vissage Auto Parts Co., Friendship Church Road, is the orphan site whose position could not be located. This site was the location of one tank that has since been abandoned. The tank was a steel 500-gallon gasoline tank was removed from the site in 1992. One release was reported for the site on October 18, 1995. Cleanup was initiated on June October 7, 1996 and was completed on March 19, 1999. A No Further Action(NFA) status was declared for the site on October 18, 1999. Since the tank has been removed, this site is not considered to be a REC for the subject property.

# 5.3 Open Dumps

The Open Dump List is an inventory of facilities that do not comply with the EPA's Criteria for Classification of Solid Waste Disposal Facilities and Practices. The subject property is not on the list of open dumps. No other open dumps were observed within a 0.5-mile radius of the property.

# 5.4 Aerial Photography Review

A review of aerial photographs was conducted on October 31, 2017. The 1938, 1951, 1961, 1964, 1976, 1978, 1981, 1989, 1994, 1999, 2005, 2006, 2009, and 2011 Environmental Data Resources, Inc. aerial photographs show the subject property. A thirteen-year gap in aerial photography is noted between the years of 1938 and 1951, while a ten-year gap is noted between 1951 and 1961. A twelve-year gap is noted between the years of 1964 and 1976 and an eight-year gap in aerial photography is noted between the years of 1981 and 1989. A six-year gap is noted between 1999 and 2005. The quality of evaluation of aerial photography is controlled by the photograph's scale and quality.

The 1938 and 1951 aerials show the subject property to be mostly silvicultural. Properties surrounding the subject property are also mostly agricultural. Highway 14, located in the area property to the south of the subject property, has been constructed.

In the 1961, 1964, and 1976 aerials, the subject property appears to be transitioning from agricultural land to silvicultural land. Surrounding properties to the north, east and west are a mix of agricultural and silvicultural land. To the south of the subject property, Interstate 385 is being constructed in the 1961 aerial and appears to be complete in the 1964 aerial. There is commercial and residential development on the area properties to the south of the subject property.

In the 1978 and 1981 aerials of the subject property, the subject property remains silvicultural. Adjoining properties to the east and west are also silvicultural while adjoining properties to the north are agricultural. There is further development on area properties to the south of the subject property.

The quality of the 1989 aerial is poor and it is difficult to identify any changes to the subject property or surrounding properties.

The 1994 and 1999 aerials show little change to the subject property or adjoining properties.

The 2005 and 2006 aerials show little change to the subject property. The adjacent property to the east has been cleared and the industrial facility is under construction. There is little change to the remaining adjoining properties.

In the 2009 and 2011 aerials, the subject property remains silvicultural. Property to the west of the subject property is also silvicultural, while property to the east is an industrial facility. Property to the north is agricultural. Property to the south is commercial and residential.

# 5.5 Land Title Records Review

The land chain of title search and final review was not undertaken as part of this assessment.

# 5.6 Activity Use Limitations

A review of Federal and State records regarding NPL liens or CERCLA liens was not conducted as part of this Phase I ESA.

# 5.7 Sanborn Map Review

THOMAS & HUTTON

The complete Environmental Data Resources, Inc. Certified Sanborn Map collection was searched for fire insurance maps covering the subject property. No Sanborn Maps were identified for the subject property.

# 5.8 Vapor Intrusion

Based on review of the readily available federal and state files and visual observation of adjoining properties it appears an offsite vapor encroachment condition associated with the subject property is unlikely to exist.

Visual reconnaissance of the subject property and interviews revealed no on-site historical activities that may present a possible vapor intrusion pathway. Additionally, the EDR VEC App was utilized to evaluate vapor intrusion potential for the subject site. The EDR VEC App provides integrated data, efficient analytical tools, and professional reports to assist in compliance with the requirements of ASTM E2600-10, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." The EDR VEC App did not identify any sources that could potentially be considered a source for vapor intrusion for the subject property.

# 6.0 SITE RECONNAISSANCE

Thomas & Hutton personnel conducted a visual reconnaissance of the subject property and surrounding areas on October 26, 2017. The purpose of the reconnaissance was to detect evidence of prior or ongoing activities that may result in a recognized environmental condition. Appendix C contains photographs that provide representative views of the subject property and surrounding area obtained during the subject property visit. The visual reconnaissance consisted of a drive of the roads within 1 mile of the subject property and a walk-through of the subject property.

# 6.1 Site Reconnaissance

Following are the observations made during the reconnaissance of the subject property and the surrounding area:

#### Subject Property

- The subject property consists of one (1) parcel of property. For the most part, the subject property is heavily wooded (Photographs 6 and 7) with some portions cleared by timbering activities (Photographs 11 through 13).
- There is one gated entrance to the subject property off S Frontage Road (Photographs 15 and 16). The gate remains locked.
- Timbering activities are currently taking place onsite and equipment for these activities is currently located onsite (Photographs 4 and 14).
- There is some dumping onsite which appears to be related to the timbering activities (Photographs 5, 8, 9, and 10). These materials include tires, empty buckets, hoses, and gloves.
- There was no visual evidence (e.g., vent lines, fill connections) of any underground storage tanks located at the subject property.
- There was no visual evidence of spills, leaks, staining, stressed vegetation, or odors on the subject property.

# Adjoining Property

- S Frontage Road forms the southern property boundary (Photographs 15 and 16). Interstate 385 is located to the south of the subject property.
- Adjacent property to the north is agricultural (Photograph 3).
- Adjacent property to the east is a light industrial facility (Photograph 1).
- Adjoining property to the west is mostly undeveloped and heavily wooded.

# Area Property

- Area property to the north, east, and west is a mix of agricultural and silvicultural lands.
- The Bragg Convenience Store, the LUST site discussed in Section5.0 of this report, is located in the area property to the south of the subject property (Photograph 17).
- There is no visual evidence of any activities that would have an environmental impact on the subject property.

# 7.0 INTERVIEWS

#### 7.1 Interview with User's Representative

A written interview was conducted with the user's representative, Mr. Jonathan Coleman, Laurens County Development Corporation, on October 27, 2017. Mr. Coleman addressed all of the questions relating to the property use and possible environmental conditions in connection with the subject property in good faith and to the extent of his knowledge. Mr. Coleman was aware that the previous land use of the property was agricultural and that the site is currently being used for timbering activities. Mr. Coleman did not have any knowledge or belief that hazardous waste had been disposed on the subject property. Mr. Coleman did not have any direct knowledge of spills or chemical releases occurring on the subject property. Mr. Coleman was not aware of any environmental citations or enforcement actions related to the subject property. Mr. Coleman was not aware of any pending, threatened, or past litigation or administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property. Mr. Coleman was not aware of any activity and land use limitations that are placed on the subject property or that have been filed or recorded.

#### 7.2 Interview with Owner

A written interview was conducted with the current property owner, Monta Avera, on November 2, 2017. Ms. Avera addressed all of the questions relating to the property use and possible environmental conditions in connection with the subject property in good faith and to the extent of her knowledge. Ms. Avera stated that she was aware that the Phase I ESA was being completed to support the possible lease/sale of the subject property. Ms. Avera stated that presently, timber is being cultivated on the property and that the trees are currently being thinned. She also stated that the land had previously been used as timber and farm land. Ms. Avera claimed there are no underground storage tanks on the property that she was aware of. She did not know of any environmental concerns on or near the property. She also stated that she was not aware of any hazardous waste generation on-site or disposal of hazardous waste on-site. Ms. Avera stated she was not aware of any pending, threatened, or past litigation, administrative proceedings, or notices of violations from any governmental entity relevant to hazardous substances or petroleum products in, on, or from the property. She was also not aware of any environmental liens or activity use limitations on the property. Ms. Avera stated there was no value reduction of the property for environmental reasons.

# 7.3 Correspondence with SCDHEC Representative

Ms. Karla York with the SCDHEC Freedom of Information Office was contacted on October 31, 2017 concerning the subject property. As of the date of this report, no files relating to the subject property have been returned. Thomas & Hutton reserves the right to amend this report should the FOI Office discover files relating to the subject property.

# 8.0 FINDINGS

Based on Thomas & Hutton's visual reconnaissance of the subject property, review of land use history, review of regulatory files, and conduct of interviews the findings of the Phase I ESA are as follows:

# On-Site Recognized Environmental Conditions

There are some areas of minimal miscellaneous dumping, which will need to be removed and disposed of properly, but is not considered a recognized environmental concern based on the visual inspection of the material present. There are no on-site recognized environmental conditions identified for the subject property that may be anticipated to have a potential environmental impact on the subject property.

# Off-Site Recognized Environmental Conditions

There are no off-site recognized environmental conditions identified for the subject property that may be anticipated to have a potential environmental impact on the subject property.

# 9.0 OPINIONS

The historical use of the property is primarily agricultural and silvicultural. There are no structures present on the site and the site can be accessed by a locked gate off S Frontage Road. There is a small amount of miscellaneous illegal dumping on the subject property of materials related to the timbering activities onsite. This material will need to be disposed of properly. Based on visual observation of the material present, it is the environmental professional's opinion that it is not considered a recognized environmental condition. The Phase I ESA investigation did not identify any recognized environmental conditions on the subject property that may be anticipated to have a potential environmental impact on the subject property.

# 10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope of limitations of ASTM Standard of practice E 1527-13 for the property located on S Frontage Road, Gray Court, South Carolina in Laurens County consisting of TMS # 157-00-00-002 (122.24-acres). Any exceptions to, or deletions from, this practice are described in Section 2.0 and Section 11.0 of this report. This assessment did not reveal any evidence of any on-site or off-site recognized environmental conditions.

# 11.0 DEVIATIONS AND DATA GAPS

During the review of standard historical property use information sources data failure occurred. Data failure is considered to occur when all the standard historical use information sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the data objectives have not been met (i.e., all obvious uses of the property shall be identified at five year intervals from the present, back to the property's first developed use or 1940, whichever is earlier). The historical source review did not identify property use information at five year intervals back to 1940. However, given the available property use data, the data failure does not constitute a significant data gap and is not considered to have inhibited the overall evaluation of the subject property for recognized environmental conditions.

# 12.0 ADDITIONAL SERVICES

No additional services beyond the identified scope of work (Section 2.2) have been provided.

# 13.0 REFERENCES

All references to historical use sources, environmental record sources, and all other documentation are contained with the text of the relevant Sections of this report.

# 14.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

The signature of the Environmental Professional is provided in Appendix E.

# 15.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

The qualifications of the Environmental Professional are summarized in Appendix F.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Health & Environmental Control's Leaking UST list.

A review of the LUST list, as provided by EDR, and dated 08/22/2017 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

#### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 05/30/2017 Date Data Arrived at EDR: 06/08/2017 Date Made Active in Reports: 09/15/2017 Number of Days to Update: 99 Source: EPA Telephone: N/A Last EDR Contact: 10/05/2017 Next Scheduled EDR Contact: 01/15/2018 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 5 Telephone 312-886-6686

EPA Region 10 Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/30/2017 Date Data Arrived at EDR: 06/09/2017 Date Made Active in Reports: 09/15/2017 Number of Days to Update: 98 Source: EPA Telephone: N/A Last EDR Contact: 10/05/2017 Next Scheduled EDR Contact: 01/15/2018 Data Release Frequency: Quarterly

#### Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 10/06/2017
Number of Days to Update: 92	Next Scheduled EDR Contact: 01/15/2018

#### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 07/11/2017 Date Data Arrived at EDR: 07/21/2017 Date Made Active in Reports: 10/06/2017 Number of Days to Update: 77 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 10/20/2017 Next Scheduled EDR Contact: 01/29/2018 Data Release Frequency: Quarterly

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/11/2017 Date Data Arrived at EDR: 07/28/2017 Date Made Active in Reports: 10/06/2017 Number of Days to Update: 70 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 10/20/2017 Next Scheduled EDR Contact: 01/29/2018 Data Release Frequency: Quarterly

#### Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/13/2017	Source: EPA
Date Data Arrived at EDR: 09/26/2017	Telephone: 800-424-9346

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 09/13/2017 Date Data Arrived at EDR: 09/26/2017 Date Made Active in Reports: 10/06/2017 Number of Days to Update: 10 Source: Environmental Protection Agency Telephone: (404) 562-8651 Last EDR Contact: 09/26/2017 Next Scheduled EDR Contact: 01/08/2018 Data Release Frequency: Quarterly

#### Federal RCRA generators list

### RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 09/13/2017 Date Data Arrived at EDR: 09/26/2017 Date Made Active in Reports: 10/06/2017 Number of Days to Update: 10 Source: Environmental Protection Agency Telephone: (404) 562-8651 Last EDR Contact: 09/26/2017 Next Scheduled EDR Contact: 01/08/2018 Data Release Frequency: Quarterly

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 09/13/2017 Date Data Arrived at EDR: 09/26/2017 Date Made Active in Reports: 10/06/2017 Number of Days to Update: 10 Source: Environmental Protection Agency Telephone: (404) 562-8651 Last EDR Contact: 09/26/2017 Next Scheduled EDR Contact: 01/08/2018 Data Release Frequency: Quarterly

#### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Number of Days to Update: 94	Next Scheduled EDR Contact: 11/27/2017
	Data Release Frequency: Varies

#### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/10/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/30/2017	Telephone: 703-603-0695
Date Made Active in Reports: 10/13/2017	Last EDR Contact: 08/30/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 12/11/2017
	Data Release Frequency: Varies

#### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/10/2017
Date Data Arrived at EDR: 08/30/2017
Date Made Active in Reports: 10/13/2017

#### Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/18/2017 Date Data Arrived at EDR: 09/21/2017 Date Made Active in Reports: 10/13/2017 Number of Days to Update: 22 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 09/21/2017 Next Scheduled EDR Contact: 01/08/2018 Data Release Frequency: Quarterly

### State- and tribal - equivalent CERCLIS

SHWS: Site Assessment Section Project List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 09/19/2017	Source: Department of Health and Environmental Control
Date Data Arrived at EDR: 09/21/2017	Telephone: 803-898-0835

#### State and tribal landfill and/or solid waste disposal site lists

#### SWF/LF: Permitted Landfills List

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/08/2017Source: Department of Health and Environmental ControlDate Data Arrived at EDR: 09/11/2017Telephone: 803-734-5165Date Made Active in Reports: 09/27/2017Source: Department of Health and Environmental Control, GIS SectionNumber of Days to Update: 16Telephone: 803-896-4084Last EDR Contact: 09/08/2017Next Scheduled EDR Contact: 12/25/2017Data Release Frequency: Semi-Annually

#### State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank List

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 08/22/2017	Source: Department of Health and Environmental Control

### State and tribal institutional control / engineering control registries

RCR: Registry of Conditional Remedies

The Bureau of Land and Waste Management established this Registry to help monitor and maintain sites that have conditional remedies. A Conditional Remedy is an environmental remedy that includes certain qualifications. These qualifications are divided into two major categories: Remedies requiring Land Use Controls and Conditional No Further Actions.

Date of Government Version: 06/14/2017 Date Data Arrived at EDR: 06/16/2017 Date Made Active in Reports: 09/27/2017 Number of Days to Update: 103 Source: Department of Health & Environmental Control Telephone: 803-896-4000 Last EDR Contact: 09/08/2017 Next Scheduled EDR Contact: 12/25/2017 Data Release Frequency: Varies

#### AUL: Land Use Controls

The term Land Use Controls or "LUCs" encompass institutional controls, such as those involved in real estate interests, governmental permitting, zoning, public advisories, deed notices, and other legal restrictions. The term also includes restrictions on access, whether achieved by means of engineered barriers (e.g., fence or concrete pad) or by human means (e.g., the presence of security guards). Additionally, the term includes both affirmative measures to achieve the desired restrictions (e.g., night lighting of an area) and prohibitive directives (e.g., restrictions on certain types of wells for the duration of the corrective action). Considered altogether, the LUCs for a facility will provide a tool for how the property should be used in order to maintain the level of protectiveness that one or more corrective actions were designed to achieve.

Date of Government Version: 09/12/2017 Date Data Arrived at EDR: 09/13/2017 Date Made Active in Reports: 09/27/2017 Number of Days to Update: 14 Source: Department of Health & Environmental Control Telephone: 803-896-4049 Last EDR Contact: 09/13/2017 Next Scheduled EDR Contact: 12/25/2017 Data Release Frequency: Varies

#### State and tribal voluntary cleanup sites

INDIAN VCP R1: Voluntary Cleanup Priority Listing

A listing of voluntary cleanup priority sites located on Indian Land located in Region 1.

Date of Government Version: 07/27/2015 Date Data Arrived at EDR: 09/29/2015 Date Made Active in Reports: 02/18/2016 Number of Days to Update: 142 Source: EPA, Region 1 Telephone: 617-918-1102 Last EDR Contact: 09/25/2017 Next Scheduled EDR Contact: 01/08/2018 Data Release Frequency: Varies

#### VCP: Voluntary Cleanup Sites

Sites participating in the Voluntary Cleanup Program. Once staff and a non-responsible party have agreed upon an approved scope of work for a site investigation and/or remediation, the party enters into a voluntary cleanup contract. Staff oversees the cleanup efforts to ensure that activities are performed to our satisfaction. Upon completion of the negotiated work in the voluntary cleanup contract, the non-responsible party receives State Superfund liability protection.

Date of Government Version: 10/17/2017 Date Data Arrived at EDR: 10/17/2017 Date Made Active in Reports: 10/19/2017 Number of Days to Update: 2

#### State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

The Brownfields component of the Voluntary Cleanup Program allows a non-responsible party to acquire a contaminated property with State Superfund liability protection for existing contamination by agreeing to perform an environmental assessment and/or remediation.

Date of Government Version: 10/17/2017 Date Data Arrived at EDR: 10/17/2017 Date Made Active in Reports: 10/19/2017 Number of Days to Update: 2 Source: Department of Health & Environmental Control Telephone: 803-896-4069 Last EDR Contact: 09/08/2017 Next Scheduled EDR Contact: 12/25/2017 Data Release Frequency: Varies

#### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/19/2017 Date Data Arrived at EDR: 06/20/2017 Date Made Active in Reports: 09/15/2017 Number of Days to Update: 87 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 09/20/2017 Next Scheduled EDR Contact: 01/01/2018 Data Release Frequency: Semi-Annually

#### Local Lists of Landfill / Solid Waste Disposal Sites

## SWRCY: Solid Waste Recycling Facilities

A listing of recycling center locations.

US CDL: Clandestine Drug Labs		

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

#### Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 09/13/2017 Date Data Arrived at EDR: 09/26/2017 Date Made Active in Reports: 10/06/2017 Number of Days to Update: 10 Source: Environmental Protection Agency Telephone: (404) 562-8651 Last EDR Contact: 09/26/2017 Next Scheduled EDR Contact: 01/08/2018 Data Release Frequency: Quarterly

#### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 01/31/2015 Date Data Arrived at EDR: 07/08/2015 Date Made Active in Reports: 10/13/2015 Number of Days to Update: 97 Source: U.S. Army Corps of Engineers Telephone: 202-528-4285 Last EDR Contact: 08/25/2017 Next Scheduled EDR Contact: 12/04/2017 Data Release Frequency: Varies

#### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005 Date Data Arrived at EDR: 11/10/2006 Date Made Active in Reports: 01/11/2007 Number of Days to Update: 62 Source: USGS Telephone: 888-275-8747 Last EDR Contact: 10/13/2017 Next Scheduled EDR Contact: 01/22/2018 Data Release Frequency: Semi-Annually

#### FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 12/31/2005 Date Data Arrived at EDR: 02/06/2006 Date Made Active in Reports: 01/11/2007 Number of Days to Update: 339 Source: U.S. Geological Survey Telephone: 888-275-8747 Last EDR Contact: 10/11/2017 Next Scheduled EDR Contact: 01/22/2018 Data Release Frequency: N/A

#### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Date of Government Version: 01/01/2017 Date Data Arrived at EDR: 02/03/2017 Date Made Active in Reports: 04/07/2017 Number of Days to Update: 63 Source: Environmental Protection Agency Telephone: 615-532-8599 Last EDR Contact: 08/18/2017 Next Scheduled EDR Contact: 11/27/2017 Data Release Frequency: Varies

#### US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 05/10/2017 Date Data Arrived at EDR: 05/17/2017 Date Made Active in Reports: 09/15/2017 Number of Days to Update: 121 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 09/26/2017 Next Scheduled EDR Contact: 01/08/2018 Data Release Frequency: Quarterly

#### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 08/07/2017 Next Scheduled EDR Contact: 11/20/2017 Data Release Frequency: Quarterly

#### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 04/22/2013 Date Data Arrived at EDR: 03/03/2015 Date Made Active in Reports: 03/09/2015 Number of Days to Update: 6 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 08/24/2017 Next Scheduled EDR Contact: 11/20/2017 Data Release Frequency: Varies

#### TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2012 Date Data Arrived at EDR: 01/15/2015 Date Made Active in Reports: 01/29/2015 Number of Days to Update: 14 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 09/22/2017 Next Scheduled EDR Contact: 01/01/2018 Data Release Frequency: Every 4 Years

#### TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2014	Source: EPA
Date Data Arrived at EDR: 11/24/2015	Telephone: 202-566-0250

### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 09/27/2017 Date Data Arrived at EDR: 10/12/2017 Date Made Active in Reports: 10/20/2017 Number of Days to Update: 8 Source: EPA Telephone: 703-416-0223 Last EDR Contact: 09/08/2017 Next Scheduled EDR Contact: 12/18/2017 Data Release Frequency: Annually

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 02/01/2017 Date Data Arrived at EDR: 02/09/2017 Date Made Active in Reports: 04/07/2017 Number of Days to Update: 57 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 10/23/2017 Next Scheduled EDR Contact: 02/05/2018 Data Release Frequency: Varies

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

Date of Government Version: 10/02/2017 Date Data Arrived at EDR: 10/05/2017 Date Made Active in Reports: 10/13/2017 Number of Days to Update: 8	Source: Environmental Protection Agency Telephone: 202-343-9775 Last EDR Contact: 10/05/2017 Next Scheduled EDR Contact: 01/15/2018 Data Release Frequency: Quarterly
HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.	
Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007 Number of Days to Update: 40	Source: Environmental Protection Agency Telephone: 202-564-2501 Last EDR Contact: 12/17/2007 Next Scheduled EDR Contact: 03/17/2008 Data Release Frequency: No Update Planned
HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing	

EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Next Scheduled EDR Contact: 12/04/2017
Data Release Frequency: Biennially

#### INDIAN RESERV: Indian Reservations

This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

Date of Government Version: 12/31/2014 Date Data Arrived at EDR: 07/14/2015 Date Made Active in Reports: 01/10/2017 Number of Days to Update: 546 Source: USGS Telephone: 202-208-3710 Last EDR Contact: 10/11/2017 Next Scheduled EDR Contact: 01/22/2018 Data Release Frequency: Semi-Annually

#### FUSRAP: Formerly Utilized Sites Remedial Action Program

DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations.

Date of Government Version: 12/23/2016 Date Data Arrived at EDR: 12/27/2016 Date Made Active in Reports: 02/17/2017 Number of Days to Update: 52 Source: Department of Energy Telephone: 202-586-3559 Last EDR Contact: 08/03/2017 Next Scheduled EDR Contact: 11/20/2017 Data Release Frequency: Varies

#### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010 Date Data Arrived at EDR: 10/07/2011 Date Made Active in Reports: 03/01/2012 Number of Days to Update: 146 Source: Department of Energy Telephone: 505-845-0011 Last EDR Contact: 10/10/2017 Next Scheduled EDR Contact: 12/04/2017 Data Release Frequency: Varies

LEAD SMELTER 1: Lead Smelter Sites A listing of former lead smelter site locations.

#### US MINES 3: Active Mines & Mineral Plants Database Listing

Active Mines and Mineral Processing Plant operations for commodities monitored by the Minerals Information Team of the USGS.

Date of Government Version: 04/14/2011 Date Data Arrived at EDR: 06/08/2011 Date Made Active in Reports: 09/13/2011 Number of Days to Update: 97 Source: USGS Telephone: 703-648-7709 Last EDR Contact: 09/01/2017 Next Scheduled EDR Contact: 12/11/2017 Data Release Frequency: Varies

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS	
EDR Exclusive Records	
EDR MGP: EDR Proprietary Manufactured Gas P	lants
The EDD Description Mass (actual Oce Dis	iants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

#### EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

### **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
45059C0075C	FEMA FIRM Flood data
Additional Panels in search area:	FEMA Source Type
45059C0100C	FEMA FIRM Flood data
NATIONAL WETLAND INVENTORY	
NWI Quad at Target Property FOUNTAIN INN	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

MAP ID

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

Not Reported

LOCATION

FROM TP

GENERAL DIRECTION GROUNDWATER FLOW

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

### **ROCK STRATIGRAPHIC UNIT**

### **GEOLOGIC AGE IDENTIFICATION**

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	HIWASSEE
Soil Surface Texture:	sandy loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained
Hydric Status: Unknown	
Corrosion Potential - Uncoated Steel:	Moderate
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Thomas & Hutton were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

#### Certified Sanborn Results:

Certification # 049B-4D97-ADE8

**PO #** 26942.0000

Project Laurens County Site 14-1

#### **UNMAPPED PROPERTY**

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

10/24/17

Certification #: 049B-4D97-ADE8

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

University Publications of America

EDR Private Collection

The Sanborn Library LLC Since 1866™

#### Limited Permission To Make Copies

Thomas & Hutton (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

# **EXECUTIVE SUMMARY**

#### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

#### **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Request Number: 1710379

Re: Laurens County Site 14 Parcel 1 S Frontage Road Laurens, SC

Dear Ms. Katie McCoy,

Your request for the above referenced information has been received by the Freedom of Information Center. The Freedom of Information staff are currently researching and compiling this information. You will be notified by our office when the research process is complete. DHEC will make the requested information available for review and copying to the extent it is not protected from disclosure pursuant to section 30-4-30 of the Freedom of Information Act.

If we are unable to locate files on a facility, based on the information submitted, you will be notified by mail.

Further inquiries regarding your request should include your above mentioned Freedom of Information Request Number. We can be reached at (803) 898 - 3882.

Sincerely,

Karla York, Director U Freedom of Information Office

South Carolina Department of Health and Environmental Control

2600 Bull Street ~ Columbia, SC 29201 ~ Phone (803) 898-3432 ~www.scdhec.gov

Ms. Katie McCoy THOMAS & HUTTON 1501 MAIN ST STE 760 COLUMBIA, SC 29201

10/30/2017

Request Number: 1710379

Re: Laurens County Site 14 Parcel 1 S Frontage Road Laurens, SC

Dear Ms. Katie McCoy,

This is to advise you that the Freedom of Information Center could not locate any files on the referenced subject, company individual, and /or address as submitted. This request is now closed.

If you feel that the information you requested may be found under another name or description, please submit the additional information by fax (803) 898 - 3816 referencing the above Request Number.

If you have any questions or require further assistance, please contact our office at (803) 898 - 3882.

Sincerely,

Karla York, Director Freedom of Information Office

South Carolina Department of Health and Environmental Control

2600 Bull Street ~ Columbia, SC 29201 ~ Phone (803) 898-3432 ~www.scdhec.gov

Appendix E Signature of Environmental Professional

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in #312.10 of 40 CFR 312. I have the specific qualifications based on my education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

\_5.1

Lisa B. Muzekari, P.E.

11-2-17

H THOMAS & HUTTON

Appendix F Qualifications of Environmental Professional

# Lisa Muzekari, PE | Senior Project Manager

Lisa Muzekari is a Senior Project Manager with over 20 years of experience in environmental engineering. She has managed a practice group focusing on environmental health and safety compliance and solid waste management and is recognized in her field for providing environmental assessments, permitting, planning, and compliance strategies for municipal and private clients. Lisa's experience includes water, wastewater, air, environmental planning, permitting and compliance, industrial and hazardous waste, air modeling, and safety and emergency planning. She is responsible for various phases of engineering projects, from conception and planning to design. Lisa's areas of expertise includes air permitting/modeling; environmental assessment; stormwater management; spill prevention control and countermeasures plans; CERCLA/RCRA hazardous waste; process safety management plans; risk management programs; water, wastewater, and reuse water studies; and solid waste evaluations.

#### Education

University of South Carolina - M.S. in Civil Engineering, 1992 University of South Carolina – B.S. in Civil Engineering, 1991

#### **Professional Registrations**

Professional Engineer in SC, NC, GA

#### **Professional Associations**

Water Environment Association of South Carolina, Water Environment Federation, Carolinas Air Pollution Control Association

#### **Project Experience**

#### Hazardous Waste / Environmental Site Assessments

Various Clients, Project Manager and Environmental Professional for Phase I Environmental Site Assessment activities for various subject properties. The Phase I ESAs were conducted in accordance with ASTM Standard E1527-13.

- Union County, SC Trakas Site
- Spartanburg County, SC Victor Hill Site
- Johns Island, SC Hoggard Lane at Main Road Site
- North Charleston, SC Patriot Park Site
- Berkeley County, SC Berkeley County Schools Williams Lane Site
- Oconee County, SC Seneca Rail Site
- Beaufort County, SC Various Potential Economic Development Sites
- Richland County, SC Colony Tire Site, Bluff Road
- Spartanburg County, SC Cedar Crest Road Site
- Dorchester County, SC 2,000 acre Industrial Economic Development Site

**City of Dublin, Mulch Site Investigation, Dublin, GA**, Project Engineer responsible for the development of a Corrective Action Plan and Initial Investigation related to disposal and burning activities at the City mulch site. The investigation included an asbestos inspection/survey and soil/waste characterization sampling. Remediation activities include asbestos abatement and soil excavation. The Remediation Phase and Abatement Phase are in the process of being coordinated with GAEPD.

**Liberty Sun Energy, LLC, Environmental Assessment, Walterboro, SC,** Project Manager and Environmental Professional for the Phase I Environmental Site Assessment activities for a proposed solar farm to be located in Colleton County, South Carolina. The Phase I ESA was conducted in accordance with ASTM Standard E1527-05.

**Savannah Housing Authority – Hitch Village, Environmental Assessment, Savannah, GA**, Project Manager and Environmental Professional for the Phase I Environmental Site Assessment activities for the former Hitch Village property located in the City of Savannah, Georgia. The Phase I ESA was conducted in accordance with ASTM Standard E1527-05.

**Owens-Corning, Savannah Asphalt Facility Asbestos Abatement and Demolition, Savannah, GA**, Coordination of asbestos abatement activities and provided onsite observation throughout the duration of the project for the demolition of the Owens Corning former asphalt facility located in Savannah, GA. Prior to beginning the onsite activities, preparation of site-specific plans regarding the project, including a site-specific Health and Safety Plan, Work Plan, and Environmental Mitigation Plan. A total of 12,244 linear feet/square feet of asbestos containing material was abated, 310 tons of mixed scrap metal was transported and reclaimed, 3,500 gallons of oil and oily sludge was removed and transported for energy recovery, and 26 loads (40 yd3 boxes) of concrete was sent to crushing for reclaim. \*

Town of Moncks Corner, Umphlett Lumber Tract Environmental Assessment and Remediation, Moncks Corner SC, Provided professional engineering services to conduct response actions as identified in the SCDHEC Voluntary Cleanup Contract. Assessment activities and remediation activities included the installation and sampling of shallow ground water monitoring wells at five locations, collection of surface and subsurface soil samples at over 20 locations, collection of sediment and corresponding surface water samples at two locations, and excavation and disposal of arsenic contaminated soil. No groundwater contaminants were detected. \*

**City of Walterboro, Rizer Ford Environmental Assessment and Remediation, Walterboro, SC**, Project Manager for the Phase I and II Environmental Site Assessment activities for the former Rizer Ford Property. Investigative activities included soil and ground water evaluation. As a result of the site assessment activities, services included assisting the City with drafting a Voluntary Cleanup Contract with SCDHEC for the cleanup of the property to be used for redevelopment. \*

South Carolina Research Authority, Catawba Street Property Phase I and Phase II ESA, Columbia, SC, Conducted Phase I and Phase II Environmental Site Assessments for former warehouse site. The assessment included the installation of temporary ground water monitoring wells and groundwater sampling. \*

AME Development Group, Cypress Grove Development Site Investigation, Moncks Corner, SC, Provided preliminary site investigation of soil and water. A GPR investigation was conducted to identify subsurface anomalies (e.g., buried drums) in the area of concern and exploratory excavations were conducted with URS/BP Barber oversight. After completion of the initial investigation, URS/BP Barber proceeded with additional field activities. All areas identified in the GPR Investigation were evaluated and further excavation of waste material was conducted. Excavated material, debris and waste drums were properly contained in lined roll-off containers and samples were obtained for characterization for disposal of the hazardous and non-hazardous material. \*

**600** Assembly Street, Site Assessment, Columbia, SC, Conducted a site assessment, which included locating underground storage tanks. The assessment included a ground penetrating radar investigation, asbestos inspection, soil screening, and soil sampling. \*

**Buncombe County Landfill, Contamination Assessment, Asheville, NC,** Conducted and supervised a contamination assessment, which included installation of monitoring wells, modified Dutch Cone Penetrometer investigation, borehole geophysical investigation, discrete zone sampling, and Packer Test investigation. \*

**Fishburne International, Contamination Assessment, Asheville, NC,** Conducted and supervised a contamination assessment, which included the installation of temporary well points, groundwater and surface water sampling, and modified Dutch Cone Penetrometer investigation. \*

Kalama Chemicals, Inc., Beaufort, SC, Provided statistical support as a team member in conducting a baseline risk assessment on a Superfund Potential Responsible Party lead RI/FS project. \*

Lindau Chemicals, Site Assessment, Columbia, SC, Conducted a site assessment to locate underground storage tanks. The assessment included a ground penetrating radar investigation, soil screening, and soil sampling.\*

NASA, RCRA Facility Investigation Kennedy Space Center, Cape Canaveral, FL, Performed a RCRA Facility Investigation for a NASA facility, which included assessment of soil, surface water, and groundwater contamination.\*

Sears Fuel Storage Site, Remedial Action Plan, Miami, FL, Developed a Remedial Action Plan for the abandoned fuel storage site, which included design of recovery wells, air stripping system, infiltration gallery, and soil vapor extraction system. \*

#### Air Permitting and Dispersion Modeling

**Various Clients**, Air Permit Application Packages including permit forms, emission calculations, process descriptions, and dispersion modeling results were compiled for over 100 industries and municipalities. The Aermod, ISC2, ISC3, and Screen models were utilized in performing the air dispersion modeling.

- ABB Power T&D Company Inc.
- Aiken Regional Medical Center
- American Eagle Wheel Corporation
- American Italian Pasta Company
- American Titanium Works
- Amick Farms, Inc.
- Beaufort-Jasper Water & Sewer Authority
- BioEnergy
- Carolina International Trucks
- Charleston Water System
- City of Columbia
- Department of Public Utilities, City of Orangeburg
- Devro-Teepak
- Dixie Clay Company
- Eastern Pacific International
- EFCO Corporation
- Filtration Group Technical Media
- Fisher Tank
- Fitesa
- City of Florence
- Florence Concrete Products
- Hilton Head Island Public Service District

- Waste2 Energy, LLC
- Wateree Dyeing and Finishing Corporation
- Wateree Textile
- Weisz Graphics
- Town of Winnsboro
- Yanagawa
- York County Industries

**City of Myrtle Beach, Water Reclamation Facility, Myrtle Beach, SC**, A conditional major Title V Permit Application was prepared for the major source of hazardous air pollutants. The permit application limited the number of hours the City could operate their odor control scrubbers in order to be classified as a conditional major source. \*

**Department of Public Utilities, City of Orangeburg, WWTP, Orangeburg, SC,** Prepared a Title V Permit Application for all emission sources at the wastewater treatment plant. Permitting included a sludge dryer utilizing heat from electrical turbines. \*

**City of Columbia, Metro Wastewater Treatment Plant, Columbia, SC**, Performed Air Dispersion modeling for the sludge incinerators in order to comply with State and Federal Regulations for the stack test results. Provided professional engineering services for the renewal of the air permit. \*

**City of Columbia, Metro Wastewater Treatment Plant, Columbia, SC,** Coordinated Information Collection Rule (ICR) request from EPA for sewage sludge incineration units, including stack testing data collection, communications with EPA, and completion and submission of required documentation for EPA. The ICR resulted in the promulgation of new source performance standards and emission guidelines for sewage sludge incineration units located at wastewater treatment facilities designed to treat domestic sewage sludge.\*

**Aiken County Public Service Authority, Horse Creek Pollution Control Facility, North Augusta, SC**, Prepared the Air Permitting Application and performed Air Dispersion Modeling for sludge dryer. \*

Homelite, Inc, Greer, SC, Prepared a Title V Permit Application for all industrial activities at the Homelite Greer Facility. \*

**Tranter, Inc, Edgefield, SC,** Prepared a Title V Permit Application for all of the on-site industrial activities related to the manufacturing of heat exchange units. \*

**Devro, Inc., Sandy Run, SC,** Prepared various construction permit applications, including new production lines and boilers, and a Title V Permit Application for all industrial activities related to the manufacturing of collagen casings. Additionally, the Storm Water Pollution Prevention Plan (SWPPP), SPCC Plan, Emergency Response Plan, Process Safety Management Plan, and Risk Management Plan were prepared for the facility and are kept up-to-date in accordance with regulations and as plant changes occur. \*

**Honda Manufacturing of South Carolina, Inc., Timmonsville, SC,** Prepared various construction permit applications, including new production lines for Personal Water Craft, and Operating Permit renewals for all industrial activities related to the manufacturing of ATVs. Additionally, the Storm Water Pollution Prevention Plan (SWPPP) and SPCC Plan were prepared for the facility and are kept up-to-date in accordance with regulations and as plant changes occur. \*

**Green Energy Holdings, Bio Mass Facility, Orangeburg County, SC**, Prepared Air Permitting Application. Research and technical assistance with replying to SCDHEC on air permit application submittal.\*

**Waste 2 Energy, Waste Processing Facility, Columbia, SC,** Prepared Air Permitting Application for proposed bio energy facility, which included the anaerobic digestion of food and yard waste to produce methane to be burned in generators for power production. Emission calculations, air dispersion modeling, and air permit application prepared for submittal to SCDHEC. \*

**BioEnergy, Berkeley County, SC,** Prepared Air Permitting Application for proposed bio energy facility, which included the anaerobic digestion of municipal sludge, grease trap waste, and DAF waste to produce methane to be burned in a Combined Heat and Power (CHP) unit, boiler, and flare, when needed. Emission calculations, air dispersion modeling, and air permit application prepared for submittal to SCDHEC. Additionally, overall project management of the development of a SPCC Plan, BMP Plan, Wastewater Construction Permit, and Land Application of Biosolids Permit packages were prepared for the facility. The facility was the first of its kind in South Carolina, therefore coordination with all Bureaus of SCDHEC were required to obtain all permits for the construction and operation of the facility. The facility was permitted as a wastewater treatment facility since it accepts 503 regulated biosolids as a feed material. \*

#### **Stormwater Pollution Prevention Plans**

Developed Stormwater Pollution Prevention Plans (SWP3s) for over 75 regulated facilities. The Stormwater Pollution Prevention Plans included site assessments, identification of potential pollutant sources, development of best management practices, monitoring requirements, visual assessments, and development of management procedures to maintain site compliance. Stormwater Pollution Prevention Plans were developed in accordance with Industrial General Permits in SC, NC, and GA. Recent experience includes SWP3s prepared for the following clients:

- Alpine Utilities Stoops Creek WWTP
- American Italian Pasta Company

- Amick Farms Processing Plant
- Amick Farms Feed Mill

## Lisa Muzekari | continued

- ArvinMeritor

- Richland County Broad River WWTP
- Siemens VDO
- Spartanburg Water Landrum Page Creek WWTP
- Spirax Sarco
- Town of Summerton WWTP
- TMA
- Tyson Foods
- Yanagawa

Developed Spill Prevention Control and Countermeasures Plans (SPCCs) for numerous facilities in the Southeast. The SPCC plans were developed to addresses petroleum/oil storage and handling operations of the facility. The SPCC Plans provided the written documentation of the site-specific measures (procedural and structural) the facility was to implement to prevent or minimize any discharge of petroleum/oil into the waters of the United States. The SPCC Plans were prepared to meet the requirements of the revised SPCC Regulation (40 CFR 112). Recent experience includes SPCCs prepared for the following clients:

- American Italian Pasta Company
- Amick Broilers, Inc.
- Amick Farms, Inc.
- Arvin Meritor
- Beaufort Jasper Water and Sewer Authority

   Cherry Point WWTP
- Beaufort Jasper Water and Sewer Authority

   Port Royal WWTP

- Tyson Foods

#### **Process Safety Management Plans**

Developed Process Safety Management Programs for over 30 facilities. Prepared written programs, performed compliance audits, completed process hazard analysis, developed standard operating procedures, and evaluated and documented mechanical integrity program.

#### **Emergency Action Plans**

Developed Emergency Action Plans for the following entities:

- Greenwood Commissioners of Public Works
- Hilton Head Public Service District
- City of Bennettsville, SC

#### **Risk Management Programs**

Developed Risk Management Programs in accordance with 40 CFR 68 for the over 30 facilities. The Risk Management Programs addressed Prevention Programs, Management Programs, and Hazard Assessment Programs. Off-site consequence analyses were performed utilizing the Degadis air dispersion model to determine the extents of possible release scenarios. RMP Programs were developed for chemicals including chlorine, sulfur dioxide, and ammonia. \*

#### Stormwater Management

**Richland County, Industrial and High Risk Runoff Program, Columbia, SC**, Development of program for Richland County to control Industrial and High Risk Runoff. Richland County holds a NPDES Phase I Permit. \*

**City of Hartsville, Stormwater Utility, Hartsville, SC**, Development of financial requirements for the development of a stormwater utility for the City of Hartsville in order to comply with the upcoming requirements of NPDES Phase II permitting. \*

#### **CMOM Audits and Programs**

Anderson County, SC, Assisted in the EPA Capacity, Management, Operation, and Maintenance (CMOM) Audit conducted as part of the voluntary CMOM analysis program EPA asked Anderson County to participate in.\*

**City of Clemson, SC**, Prepared a Capacity, Management, Operation, and Maintenance (CMOM) Audit for the City of Clemson collection system. \*

East Richland County Public Service District, Columbia, SC, Prepared a Capacity, Management, Operation, and Maintenance (CMOM) Audit for the East Richland County Public Service District collection system. \* East Richland County Public Service District, Columbia, SC, Prepared a Capacity, Management, Operation, and Maintenance (CMOM) Program for the East Richland County Public Service District including several programs for operation and maintenance of the collection system. \* Laurens County Water and Sewer Commission Laurens, SC, Prepared Capacity, Management, Operation, and Maintenance (CMOM) Program components for the Laurens County Water and Sewer Commission including various programs for the operation and maintenance of the collection system. \*

**City of Myrtle Beach, SC**, Prepared a Capacity, Management, Operation, and Maintenance (CMOM) Audit and CMOM Program for the City of Myrtle Beach collection system.\*

**Town of Summerton, SC,** Prepared a Capacity, Management, Operation, and Maintenance (CMOM) Audit for the Town of Summerton collection system. \*

**Town of Summerton, SC**, Prepared a Capacity, Management, Operation, and Maintenance (CMOM) Program for the Town of Summerton including various programs for the operation and maintenance of the collection system. \*

**Taylors Fire and Sewer District, Taylors, SC,** Prepared a Capacity, Management, Operation, and Maintenance (CMOM) Program for the Taylors Fire and Sewer District including several programs for operation and maintenance of the collection system. \*

#### Solid Waste Management

Anderson County, Financial Analysis of Waste Management Alternatives, Anderson, SC, Prepared a financial analysis of waste management alternatives. Analysis included the construction of a regional Subtitle D facility and the contrasting with a private company to purchase the County landfill and provide solid waste management services. \*

Chester County, Financial Analysis of Waste Management Alternatives, Chester, SC, Prepared a financial analysis of waste management alternatives. \*

York County, Financial Analysis of Waste Management Alternatives, York, SC, Prepared a financial analysis of waste management alternatives. Analysis included the construction of a Subtitle D facility and the utilization of a regional landfill. The analysis also included a C&D landfill and composting area for yard waste. \*

Homelite, Waste Minimization Plan, Columbia, SC, Responsible for development of Waste Minimization Plan for production activities at the Homelite facility. \*

**York County, Groundwater Quality Assessment Plan, York, SC**, Prepared a groundwater quality assessment plan for the York County Landfill. The plan addressed placement of monitoring wells and required analyses. \*

#### Source Water Assessment Programs

**Beaufort Jasper Water & Sewer Authority, Okatie, SC,** Developed a Source Water Assessment Program for the Beaufort Jasper Water & Sewer Authority to locate potential contaminant sources for their wells and surface water source. The project included the coordination between the BJW&SA and the City of Savannah SWAPs. \*

**City of Bennettsville**, **SC**, Developed a Source Water Protection Program for the City of Bennettsville Water Treatment Plant to locate potential contaminant sources for their wells and surface water source.\*

**Eastern Band of Cherokee Indians, Cherokee, NC,** Developed a Source Water Assessment Program for the Qualla Boundary in Cherokee, North Carolina. The SWAP included one surface water source, six springs, and over thirty wells. The SWAP was coordinated with EPA Region IV and included GPS and GIS deliverables. \*

**City of Savannah, GA,** Developed a Source Water Assessment Program for the City of Savannah I&D Water Treatment Plant to locate potential contaminant sources for their surface water source. The project included the coordination between the City of Savannah and the Beaufort Jasper Water and Sewer Authority and the formation of a Source Water Protection Task Force Committee. \*

#### Water, Wastewater and Reuse Water Plans and Studies

**Chester County, Countywide Wastewater System Study, Chester, SC**, Preparation of an engineering study to address the existing wastewater infrastructure and potential future growth countywide in determining alternatives for expansion of the wastewater collection system and treatment facilities. The study included preliminary cost estimates for proposed expansion of the existing system, population projections, and collection system mapping. \*

**Clarendon County, Countywide Wastewater Study, Manning, SC,** Preparation of an engineering study to analyze alternatives to create a regional sewer system in Clarendon County, including the consolidation of existing municipal systems. The study included preliminary cost estimates for various alternatives, as well as population and flow projections. \*

**City of Clemson, Evaluation of Long-Term Water Supply Options, Clemson, SC,** Performed an engineering analysis of long-term water supply options for the City of Clemson, Clemson University, and Town of Central. The study included a present worth cost analysis of water supply alternatives, including wholesale alternatives, as well as the construction of a new water treatment plant. \*

**City of Conway, Water and Wastewater System Evaluation, Conway, SC**, Project Engineer for the evaluation and financial planning of the City's water and wastewater systems. Responsible for data acquisition and evaluation of existing programs for the water distribution and sewer collection systems. Responsible also for determining future areas of growth and assisted in the determination of future capital improvement projects and prioritization. Served as the liaison to Raftelis Financial Consultants in the development of the rate model and financial plan for the water and sewer systems. \*

**Dillon County, Regional Sewer Study, Dillon, SC,** Preparation of an engineering study to analyze alternatives to create a regional sewer system in Dillon County, including the consolidation of existing municipal and private systems. The study included a present worth cost comparison for the identified alternatives. \*

**Town of Gifford/Hampton County, Water and Wastewater Viability, Hampton, SC**, Assisted with the development of a Water and Wastewater Viability Study for Hampton County, which included alternatives for regionalization of water and wastewater service in Hampton County, as well as analysis of available water and wastewater services, projected demands, and the means to provide water and wastewater to locations within the County, with a focus on consolidation and possible expansion and interconnection of existing suppliers. \*

James Island Public Service District, Sewer System Evaluation, Charleston, SC, Project Manager for the District's sewer system evaluation. Coordinated the asset data compilation and facilitated the valuation of the sewer system assets. \*

**Marlboro County, Countywide Water Study, Bennettsville, SC**, Performed a countywide engineering study for water supply throughout Marlboro County, including municipal and privately owned systems. The study analyzed the feasibility of creating a countywide system and the expansion of the existing systems into unserviced areas of the County. \*

**Renewable Water Resources, Assessment of Biosolids Environmental Management System (EMS), Greenville, SC,** Conducted an assessment of the developing ReWa Biosolids Environmental Management System (EMS) to aid ReWa in determining areas of the program that needed further development. Aided ReWa in their Biosolids EMS Program by developing Element 3 of their program. \*

**Renewable Water Resources, Durbin Creek Wastewater Treatment Plant (WWTP) Reuse Water Feasibility Study, Greenville, SC,** Development of the Durbin Creek WWTP Reuse Water Feasibility Study for WCRSA which included various alternatives for the reuse of effluent from the WWTP. \*

Renewable Water Resources, Gilder Creek Wastewater Treatment Plant (WWTP) Reuse Water Feasibility Study and PER, Greenville, SC, Development of the Gilder Creek WWTP Reuse Water Feasibility Study and Reuse Preliminary Engineering Report for ReWa which included various alternatives for the reuse of effluent from the WWTP.\*

**Spartanburg Sanitary Sewer District, Collection System Evaluation, Spartanburg, SC**, Project Engineer for the City of Spartanburg's collection system evaluation. Responsible for coordinating the evaluation that included asset evaluation, compliance history and a financial records review. Worked closely with Raftelis Financial Consultants in the data acquisition necessary for the rate model development and financial impact analysis. Responsible for all presentations to the SSSD and City personnel to help facilitate negotiations for the transfer of assets. \*

#### Water Distribution/Treatment and Associated Projects

**Beaufort Jasper Water & Sewer Authority, Regional Water System Feasibility Study, Sheldon Township, SC,** Conducted a feasibility study for a new regional water system for Sheldon Township for the Beaufort Jasper Water & Sewer Authority. The study was performed to determine the most cost effective method of providing potable water and fire protection to the Sheldon Township area of northern Beaufort County. \*

**Charleston Water System, Raw Water Intake Model, Charleston, SC,** Developed a Fortran Model to hydraulically analyze the raw water intake system for the Water Treatment Plant for the Charleston Water System. \*

Edgefield County Water & Sewer Authority, Preliminary Engineering Report (PER) Water Distribution System Improvements, Edgefield, SC, Prepared a PER for improvements to the Edgefield County Water Distribution System. \*

#### Wastewater Collection/Treatment and Associated Projects

Aiken County Public Service Authority, Preliminary Engineering Report (PER) Sludge Composting Facility at Horse Creek Pollution Control Facility, North Augusta, SC, Prepared a PER for a sludge composting facility at the Horse Creek Pollution Control Facility. Additional air permitting services were provided for a sludge dryer. \*

American Eagle Wheel Corporation, Pretreatment System Improvements, York, SC, Assisted in permitting with SCDHEC and the City of York for pretreatment system improvements. \*

Beaufort-Jasper Water & Sewer Authority, St. Helena Wastewater Treatment Plant (WWTP) 201 Facilities Plan, St. Helena Island, SC, Responsible for the development of a 201 Plan for the upgrade and expansion of the St. Helena WWTP. \*

Beaufort-Jasper Water & Sewer Authority, Preliminary Engineering Report (PER) St. Helena Wastewater Treatment Plant (WWTP) Expansion, St. Helena Island, SC: Preparation of Preliminary Engineering Report for Beaufort-Jasper Water & Sewer Authority for the expansion of the St. Helena WWTP. \*

**City of Bennettsville, Sludge Land Application Plan, Bennettsville, SC,** Preparation of plan for land application of Bennettsville's Wastewater Treatment Plant sludge on Becker Minerals reclamation sites. \*

City of Bishopville, Rate Analysis, Bishopville SC, Performed a rate analysis for the City's water and sewer systems. \*

**City of Conway, Conway Wastewater Treatment Plant (WWTP) 201 Facilities Plan, Conway, SC:** Responsible for development of 201 Facilities Plan for the upgrade and expansion of the Conway WWTP. \*

**Diebold, Operation and Maintenance Manual, Sumter, SC**, Preparation of Operation and Maintenance Manual for Diebold's Industrial Wastewater Pretreatment Facility. \*

Edgefield County Water & Sewer Authority, Preliminary Engineering Report (PER) Land Application of Alum Sludge, Edgefield, SC, Prepared a preliminary engineering report for the land application of alum sludge on private land. \*

Kershaw County Water & Sewer Authority, 208 Water Quality Management Plan Camden, SC, Responsible for development of 208 Water Quality Management Plan for the unincorporated areas of Kershaw County. \*

City of Lake City, Rate Study, Lake City, SC, Performed a rate study for the water and sewer systems to include wholesale services for sewer service. \*

**MTU Detroit Diesel, Oil/Water Separator, Aiken, SC**, Assisted in permitting with SCDHEC and the Aiken County Public Service Authority for the construction of an oil/water separator. \*

National Dye Works, Wastewater Treatment Plant (WWTP) Operation and Maintenance Manual, Lynchburg, SC, Preparation of Operation and Maintenance Manual for National Dye Works' Industrial WWTP. \*

**City of Newberry, Newberry Wastewater Treatment Plant (WWTP) 201 Facilities Plan, Newberry, SC**, Responsible for development of 201 Facilities Plan for the expansion of the Newberry WWTP. \*

Town of Pamplico, Cost Effective Analysis of Wastewater Alternatives, Pamplico, SC, Performed a cost-effective analysis for several wastewater treatment alternatives, which included capital costs and annual operation and maintenance costs. \*

**City of Walterboro, Sludge Management Plan, Walterboro, SC**, Developed Sludge Management Plan for the City's wastewater treatment facility to determine the most cost-effective means of sludge disposal. As a result of the sludge management plan, a preliminary engineering report was prepared and a permit obtained for land application of sludge on private farmland.\*

\* Prior Experience with Previous Employer(s)
